Helpsheet 3 - Purchasing Downloads from the GFHS shop

Example :-   Purchase **Briton Ferry Giant Grave**

After you have purchased the download go to "**My Details**" top right on the screen
Under **"My Account"** you will see (in blue) **My Orders and downloads** – Select this
You will now see a screen headed **Available downloads.**
Scroll down until you see :-   Briton Ferry Giant Grave

Click on this and **save**
It will normally go to the **download directory** under **My Documents** on your PC

On your PC select the **Download** directory   - hopefully this will be empty except for the downloaded file.

Select file "**11 product – Download -   BritonFerry Giant Grave. Zip**"
You must now extract the **zip** files
Select the file and right click the mouse
Select **Extract All,**   An Extraction wizard appears   Select **Next**   and then **Finish**
You will now see the extracted folders in the download directory

You should have now successfully downloaded and extracted all the files
Select the **Agreement** file and the index should appear which you can now use.

You should then make a new directory in my Documents "**BritonFerry Giant Grave** " and copy all the files into that directory. You can then delete all the files in the Download directory ready for the next download

This is the most complicated procedure you will have to operate.

NB   For Large Downloads, which contain more than one file, see **Helpsheet 4.**
